In this presentation I introduce EOT, explain why it was created, how it works, examine some of the teaching and learning materials and lay out the seven easy steps that teachers can lead their students on and which will give them a quality, interactive and amazingly inexpensive and interactive real practice English course incorporating focused speaking and listening practice with fluent and native speakers of English.

The course is ideal for non-native speaker teachers of English anywhere, you do not need to be teaching in an English speaking country because the instructions and materials explain clearly how you and your students can use the internet and lots of free websites and resources to get top quality and confidence boosting real speaking practice online for free.

There are just seven easy steps to changing the way you teach and your students learn English. Once you know how to do it, it will make you wonder why you didn't think of it yourself! :-)
